RIZWAN ABDUL

CYBERSECURITY UNDERGRADUATE | SECURITY OPERATIONS | NETWORK SECURITY | DIGITAL FORENSICS

rizwanabdul8227@gmail.com | 6301238079 | LinkedIn : Rizwan Abdul | GitHub : Rizwan1821

PROFESSIONAL SUMMARY

Cybersecurity undergraduate with hands-on exposure to network security, Linux, digital forensics, packet analysis, operating systems, databases, and security investigation techniques. Experienced with Wireshark, Kali Linux, memory forensics, disk imaging, and network traffic analysis. Strong foundation in computer networks, operating systems, DBMS, cybersecurity concepts, and programming. Interested in Security Operations, SOC Analysis, Threat Detection, Incident Response, Network Security, and Digital Forensics.

CORE SECURITY & TECHNICAL SKILLS

Cybersecurity: Network Security, Security Monitoring, Vulnerability Assessment, Incident Response Fundamentals, Digital Forensics, Threat Analysis, Authentication & Access Control

Networking: TCP/IP, HTTP, DNS, IP Addressing, Ports & Protocols, Packet Analysis, Network Traffic Monitoring, Wireshark

Forensics: Memory Acquisition, Memory Analysis Fundamentals, Disk Imaging, Evidence Handling Fundamentals, DCFLDD, LiME, Volatile Data Analysis

Systems: Linux, Kali Linux, Windows, Process Management, Memory Management, File Systems, CPU Scheduling

Programming: Python, Java, C, JavaScript, SQL

Databases: PostgreSQL, MySQL, DBMS, SQL Queries, Database Design

Tools / Platforms: Wireshark, Kali Linux, VS Code, Postman, Git/GitHub, pgAdmin, Termux

Web / Backend: HTML, CSS, JavaScript, React, Node.js, FastAPI, REST APIs

CYBERSECURITY PROJECTS

Network Traffic Analysis & Security Monitoring | *Wireshark | TCP/IP | HTTP | Apache | MySQL*

- Captured and analyzed network packets using Wireshark to understand real-world communication patterns.
- Inspected HTTP traffic and filtered packets based on source and destination IP addresses.
- Examined network communication associated with Apache and MySQL services.
- Used packet-level analysis to understand protocols, ports, endpoints, and communication flows.

Digital Forensics & Memory Analysis | *Kali Linux | LiME | DCFLDD | Linux*

- Practiced digital-forensics procedures involving volatile memory acquisition and disk imaging.
- Explored memory acquisition using LiME and forensic disk acquisition concepts using DCFLDD.
- Studied evidence integrity and forensic collection workflows during investigation exercises.
- Worked with Linux-based forensic environments to understand evidence collection and analysis.
- Applied software practices relevant to authentication, data validation, API security, and database protection.

UrbanSeva — Community Service Platform | *Node.js | JavaScript | HTML | CSS | REST APIs*

- Designed a web platform connecting users with local service providers.
- Developed backend functionality for profile management and administrative operations.
- Worked with server-side logic, data handling, and API-based communication.
- Considered access control and administrative separation while designing application functionality.

EDUCATION

B.Tech — Cybersecurity | Swarnandhra College of Engineering and Technology, Narsapur

Expected Graduation: 2027 | Relevant Coursework: Computer Networks, Operating Systems, DBMS, Cybersecurity, Digital Forensics, Programming, Web Technologies

HANDS-ON SECURITY EXPERIENCE

- Performed packet capture and network traffic inspection using Wireshark.
- Analyzed HTTP communication and investigated traffic using source/destination IP filters.
- Worked with Linux and Kali Linux environments for cybersecurity experimentation.
- Practiced digital-forensics concepts involving RAM acquisition and disk imaging.
- Studied TCP/IP, ports, protocols, addressing, and client-server communication.
- Developed understanding of operating-system concepts relevant to security investigations.

CERTIFICATIONS & TRAINING

CYBER SECURITY

- For completing the project in Cyber Security with Embrizon Technologies.

INTEGRATING AI IN WEB & APPLICATION DEVELOPMENT

- A practical workshop to empower with essential AI skills to develop real time applications Using Gen-AI tools by Mentorly.

CYBER SECURITY

- A Hands-on Workshop on Cyber security tool by Synthoquest pvt, limited.

AREAS OF INTEREST

SOC Operations | Security Analysis | Network Security | Threat Detection | Incident Response | Digital Forensics | Vulnerability Assessment | Cloud Security | Application Security

ADDITIONAL INFORMATION

Languages: English, Telugu, Hindi, Urdu |
